SALAD MIX / SPECIALTY LETTUCE PRODUCT GUIDE

Thinking lettuce? Think **Terranova.**

Hendrix

Green Tango

- **HENDRIX** is a multileaf Green Tango lettuce
- It is a highly vigorous, quick maturing type with very high yield potential. It has a strong leaf texture that washes well and is suitable for multiple harvests.
- **DM Resistances:** 16, 19, 21, 23 & 25

Marley

Green Tango

- **MARLEY** is very high yielding with highly incised leaf shape
- The colour is dark green and the texture is strong
- The product washes well and complements Terranova BOWIE (Red Tango).
- **DM Resistances:** 16-23

TSM 4139

Dark Green Tango

- **TSM 4139** is another Dark Green Tango.
- It has a HENDRIX leaf type but with better Downy Mildew resistance
- A high yielding, mid maturity variety with excellent leaf texture
- TSM 4139 has a very fine cut surface

Thinking lettuce? Think **Terranova.**

Cilla

Green Oak

- **CILLA** is a well coloured Green Oak
- The leaf margin is quite serrated and the texture is very tough
- Cilla is slower growing than some other varieties. A feature is dark green foliage.
- Very good regrowth potential.
- **DM Resistances** : 16, 18-20, 23-25

Presley

Green Salad Cos

- **PRESLEY** is a new generation ORBISON type with a better Mildew package
- The leaf is slightly wider offering better yields. The colour and leaf texture are very similar
- Presley has shown excellent Mildew tolerance in field trials
- **DM Resistances** : 16-26

Zeppelin

Green Oak

- **ZEPPELIN** is a Green Oak type
- The variety has a dark green leaf with smooth lobed margins
- It is a medium vigour line and holds well in the field at maturity
- **DM Resistances** : 16-28

Aretha

Red Salad Cos

- **ARETHA** is the next generation of Red Cos types. It is bred for improved shelf life and Mildew protection
- It has a very thick leaf texture and a slightly blistered leaf
- Aretha has a small leaf attachment and high yield potential
- **DM Resistances** : 16-28

Thinking lettuce? Think **Terranova.**

Bowie

Green Oak

- **BOWIE** is a Red Tango from Terranova that replaces OPAL.
- It offers better Mildew resistance and a more intense red colour, but has similar growth times and leaf characteristics
- The highly serrated leaves with strong texture ensures that it washes very well.
- **DM Resistances** : 16-28

Sheeran

Red Oak

- **SHEERAN** is a mid sized Red Oak with a very intense dark glossy red colour and mid green internals
- It is a multi leaf type and has a high level of Downy Mildew resistance
- Sheeran has a lobed leaf and a round leaf margin and is an excellent multileaf
- **DM Resistances** : 16-31

Hucknall

Red Coral

- **HUCKNALL** is a high yielding Red Coral variety
- The leaf texture is thicker and stronger for longer shelf life. It is suitable for multiple harvests
- **DM Resistances** : 16-26; Good field tolerance to Bacterial Spot.

Thinking specialty lettuce? Think **Terranova.**

Greenburg

Greenleaf

- **GREENBURG** is a new release hamburger leaf lettuce for processing
- It has a very thick, strong textured, dark green leaf with a lightly frilled edge
- Good factory recovery due to highly uniform leaf size and shape
- Very good shelf life

TLS 7049

Greenleaf

- **TLS 7049** is the next generation of Greenleaf specialty lettuce developed for higher yields and low leaf brittleness
- Higher leaf counts with darker, more uniform leaf colour across the entire leaf and improved texture
- More durability with low leaf damage during the wash processing which leads to increased recovery
- **LIMITED TRIAL SEED AVAILABLE**

Thinking specialty lettuce? Think **Terranova.**

ZAZU

Cos

- **ZAZU** is a new Poco type Cos lettuce
- Compared to Poco - it offers slightly heavier weights through increased leaf numbers and has a darker leaf colour
- Zazu performs well against bolting and tipburn
- Great tasting
- **DM Resistances** : 16-23

TLC 5034

Mini Green Cos

- **TLC 5034** is a new release miniature Green Romaine
- Extremely fast maturing with a high number of usable leaves
- Nice glossy leaf colour that extends down the length of the leaf
- Extremely good taste

Simba

Mini Cos

- **SIMBA** is a new Mini Cos with high levels of Downy Mildew resistance
- Very attractive, glossy red leaf with excellent texture
- Good bolt and tipburn tolerance
- No internal bleeding
- **DM Resistances** : 16-31

Star 1511

Mini Cos/Gem

- **STAR 1511** is a much smaller version of RANGER and looks similar in every way
- Needs high density planting and should suit a twin pack Mini Cos market
- Stays open at maturity
- **DM Resistances** : 16-23

Thinking rocket varieties? Think **Terranova.**

Darkita

Speedy Rocket

- **DARKITA** is the latest release speedy Rocket from Terranova
- Compared to GEMINI, it has a darker leaf colour and more finely serrated leaf shape
- The leaf is very uniform in size and shape and holds colour well after harvest

Gemini

Speedy Rocket

- **GEMINI** is a speedy Rocket with a Wild Rocket appearance
- It has a dark green serrated leaf with low internal yellowing
- Fast maturing and high yielding, Gemini has good post harvest attributes. Slightly milder taste compared to Wild Rocket

Extrema

Wild Rocket

- **EXTREMA** has finely serrated leaves which are dark green and aromatic
- This variety has a slightly bitter, peppery flavour and yields very well
- It has good bolting tolerance for a Wild Rocket variety and re-grows well after harvest

Thinking specialty lettuce? Think **Terranova.**

Red Leaf

Beet

- **RED LEAF** is a salad leaf Beet with beautiful deep red colour
- Smooth leaves with a strong texture and upright growth habit makes harvesting easier
- It is best grown in cooler periods as the red leaf colour is lost during periods of rapid growth

Rhubarb Red

Swiss Chard

- **RHUBARB RED** is a reliable and well maintained commercial variety popular in Australian salad growers' programmes
- Selected for improved bright red stems which extend well into the leaf veins
- The leaf colour is bright green and contrasts well with the dark red stem

Snooker

Hybrid Red Tatsoi

- **SNOOKER** is a hybrid miniature Red Tatso bred specifically for salad leaf production
- The leaf is dark red and maintains its colour during warm periods
- The habit is upright and the petiole length is long for easier harvest
- Leaf shape is highly uniform.
