

ENZA HERB PRODUCT GUIDE 2020

Welcome

Herbs are an extremely important part of the Terranova Product Range and we are committed to growing our sales by providing Australian growers with a wide range of top quality varieties.

Seed quality and infield support are a critical part of our ongoing commitment to this exciting market. Herbs for both Fresh Market in pots or fresh cut variants continue to show strong growth in the Australian market. In addition, various forms of processing are increasing the range of textures and flavours available to our growers and consumers.

Terranova Seeds have been working with a wide range of ENZA herbs for many years. We are very pleased to be able to offer a large and diverse range of species and varieties as detailed in this catalogue.

We are committed to ongoing product development of the ENZA Herb range, on this basis we look forward to introducing new varieties into the market in the years ahead.

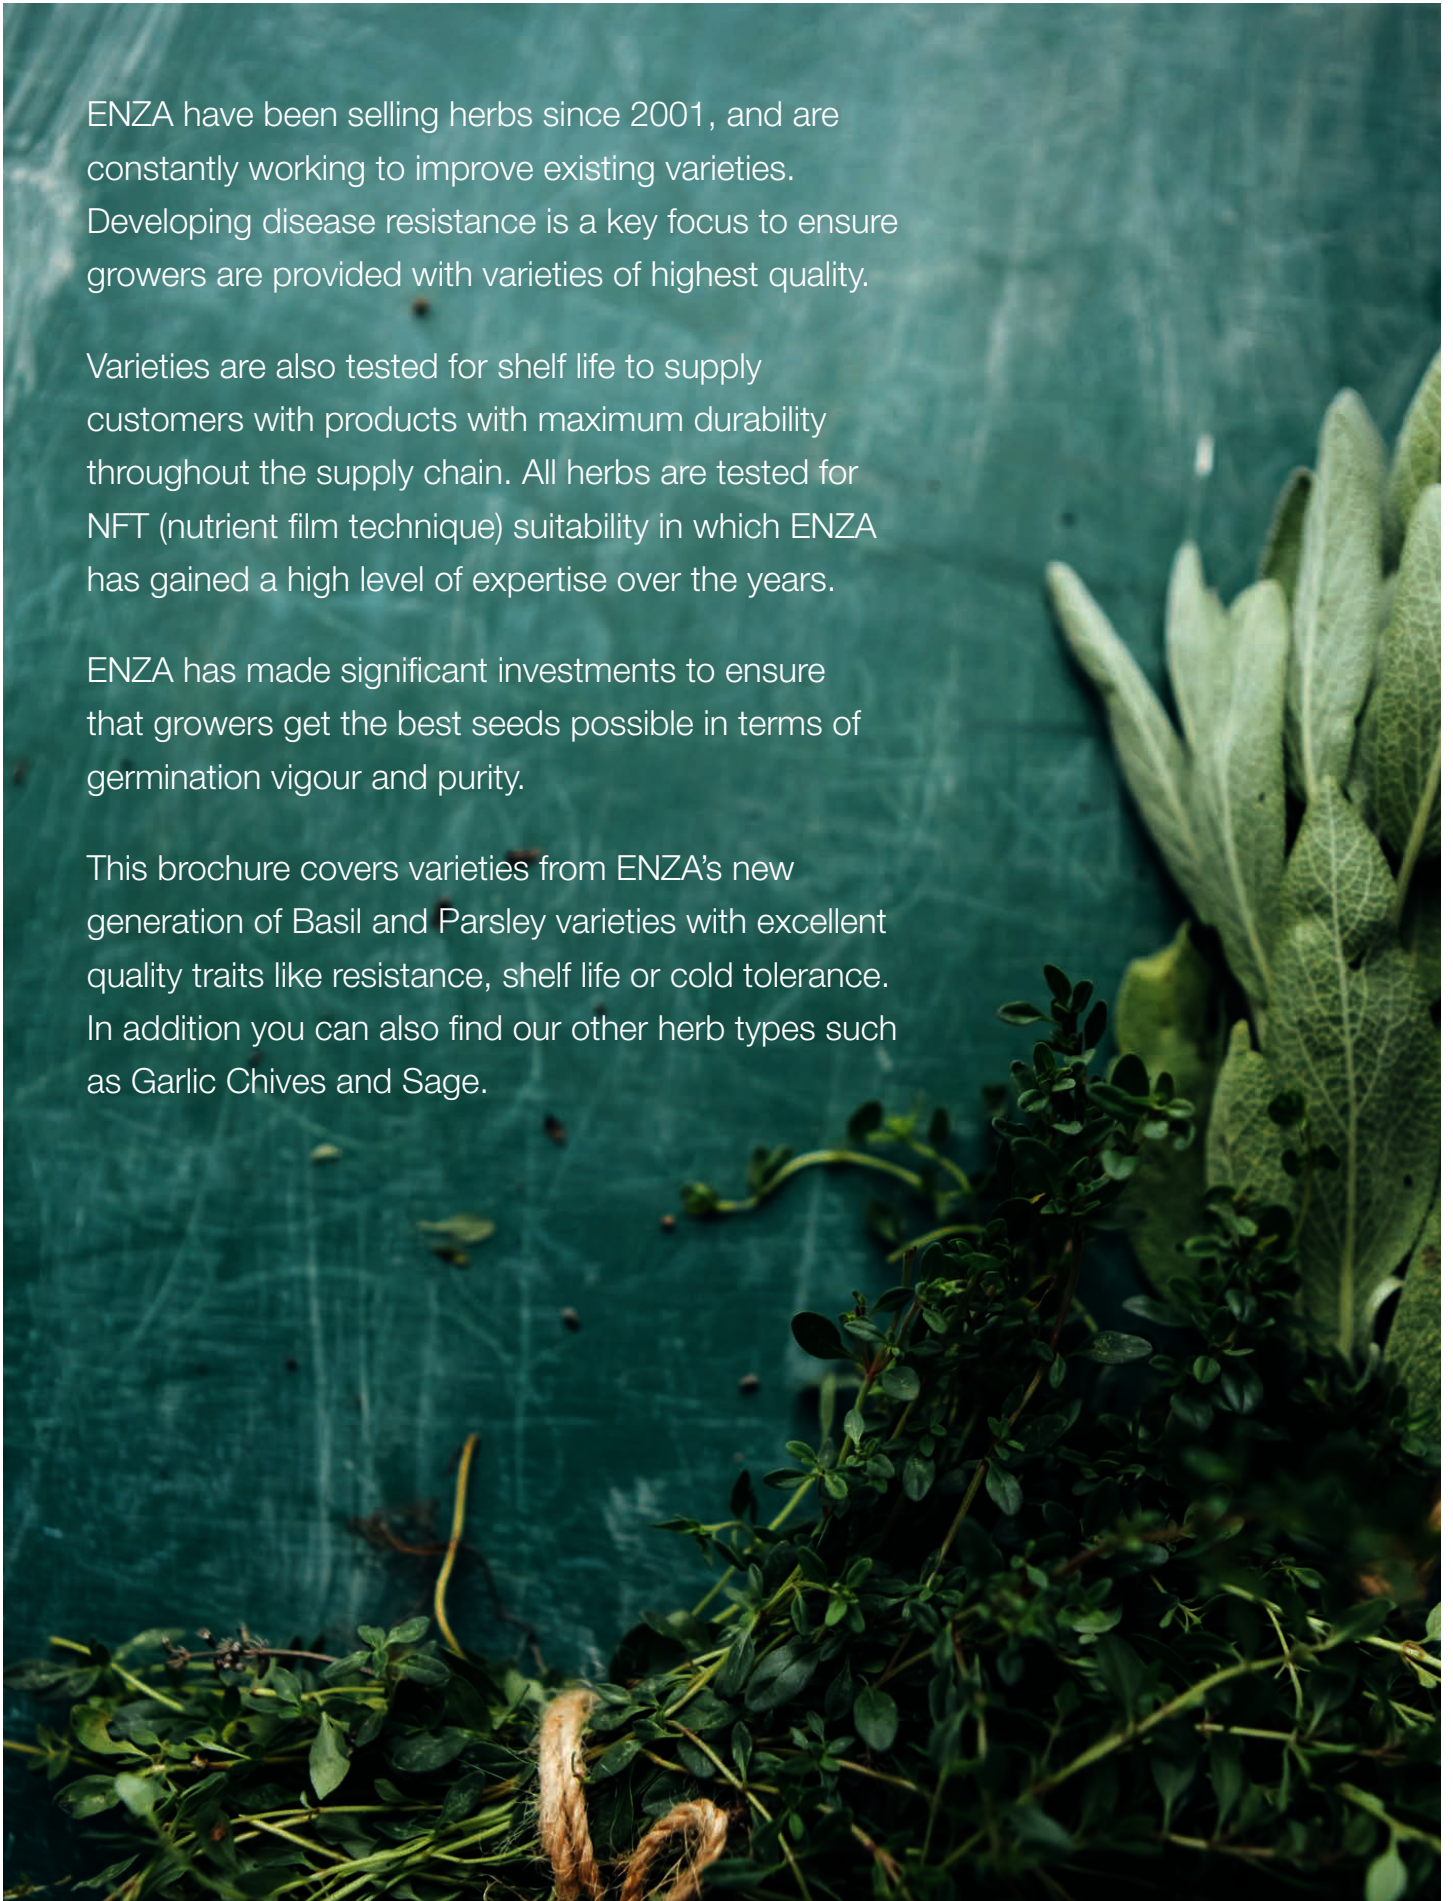

The Enza Herb Story

ENZA have been selling herbs since 2001, and are constantly working to improve existing varieties. Developing disease resistance is a key focus to ensure growers are provided with varieties of highest quality.

Varieties are also tested for shelf life to supply customers with products with maximum durability throughout the supply chain. All herbs are tested for NFT (nutrient film technique) suitability in which ENZA has gained a high level of expertise over the years.

ENZA has made significant investments to ensure that growers get the best seeds possible in terms of germination vigour and purity.

This brochure covers varieties from ENZA's new generation of Basil and Parsley varieties with excellent quality traits like resistance, shelf life or cold tolerance. In addition you can also find our other herb types such as Garlic Chives and Sage.

Genoveser

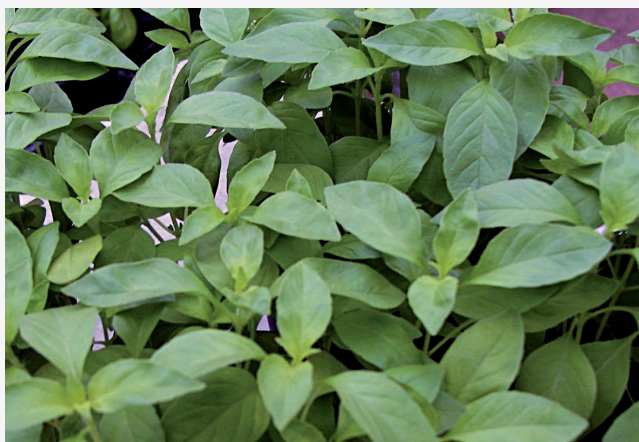

- Compact growing variety
- Short internodes
- Good shelf life
- Large leaves
- Medium green colour
- Suitable for pot or field production.

Marian

- Very good flavour
- Small leaf
- Uniform compact growth
- Flat leaves
- Good for packaging
- Suitable for pot production and open field.

Lemona

- Fine-leaved
- Fast-growing
- Clear lemon aroma
- Suitable for pot production.

Piccolino

- Small leaves
- Typical Genovese taste
- Strong aroma suitable for original pesto
- Compact growth
- Ideal for pot growing.

Rosie

- Intensive dark red colour
- Very uniform habit
- Excellent aroma
- Suitable for pot production and fresh cut.

Other varieties

VARIETY	CULTIVATION			DESCRIPTION
	FRESH CUT	PROCESSING	POT PLANT	
Dolly	X	X		Very uniform, large leaved fast-growing variety with improved tolerance to low temperatures. Recommended for open field and processing.
Edwina			X	Reliable variety in the Genovese type for year-round pot production. Under low light conditions this variety produces shiny dark green leaves.
Eleonora	X	X		Intermediate resistance against Downy Mildew. Big, lightly serrated leaves. For open field and processing.
Emma			X	New pot variety with a dark Genovese leaf and intermediate resistance against Downy Mildew.
Emily	X	X	X	Very compact pot variety. Genovese type with medium large leaves. Emily is recommended for summer production in cooler climates, all year round in hot climates or production under high light intensity. Excellent shelf life.
Keira	X	X	X	New Marian type for pot production and processing with excellent shelf life. Has shown good tolerance to cooler temperatures.

Katinka

- Double curled leaf type
- Very high yield
- Uniform in growth and curl
- Upright and easy to clean
- Very good for field and pot production.

Orfeo

- Double curled
- Very uniform
- Dark green, strong curled leaves
- Excellent shelf life
- Suitable for pots and outdoor production.

Peione

- Gigante D' Italia Type
- Intermediate resistance against DM
- Big leaves
- Dark green
- High yield
- Suitable for pot production and bunching.

Wega

- Moss curled
- Dark green upright leaves
- Very good shelf life
- For outdoor production and for pots
- Suitable for both fresh market and processing.

Biggy

- A thick shafted variety
- Dark blue-green leaf colour
- Very vigorous
- Excellent for fresh market and processing.

Staro

- Extra thick hollow leaves up to 25cm in length
- Dark green
- Suitable for outdoor production and pots.

Kobold

- Garlic chive
- Mild garlic like flavour
- Continuously cut fresh leaves and flowers
- Suitable for pot production and bunching.

Other varieties

VARIETY	CULTIVATION			DESCRIPTION
	FRESH CUT	PROCESSING	POT PLANT	
Naomi	X		X	Medium to thick leaf shaft, dark green leaf which shows rapid growth, the leaves also have a high resistance against brown tips. The variety is very suitable for the fresh market. Excellent shelf life makes this variety suitable for processing. Reliable variety for winter production in southern hemisphere.
Nelly	X	X		A fine to medium thick leaf shaft with a very dark blue-green colour. Very vigorous and upright growing. Strong against diseases and thrip damage. For fresh market and industry purposes.

Goldkrone

- Very high yielding
- Longer cutting time
- Suitable for field production and fresh cut
- Limited use for pot production.

Greensleeves

- All year production
- Thick stems
- Good colour
- High yield
- Suitable for processing.

Other varieties

VARIETY	CULTIVATION			DESCRIPTION
	FRESH CUT	PROCESSING	POT PLANT	
Ella	X		X	Dark blue-green plants with a lot of leaf tips. Ella produces compact and very stable plants for pot production. It is also suited to harvest fresh.
Ida	X	X		Standard Dill
Teddy	X		X	New variety with many tips. It develops nice green colour and is ideal for bunching and pot production.

Chervil - Massa

- Sometimes called French parsley or garden chervil
- Uniform selection in the smooth leaf type
- High yield
- Dark leaves.

Oregano - Greek

- Strong perennial bushy plant
- Very sharp oregano aroma and flavour
- Best used for growing in pots.

Rosemary - Remy

- French selection
- Strong perennial plant with bushy habit
- Suitable for both outdoor cultivation and for pot culture.

Sage - Fanni

- High quality sage selection with large leaves
- Excellent yield
- Perennial plant
- Suitable for fresh cut, processing and growing in pots.

Thyme - German Winter

- Continual harvest of the young leaves and shoots
- Perennial plant
- Suitable for fresh market and processing.
