## ZUCCHINIS

## Cultural Information

## General

Climate Requirement: Although they will tolerate very hot conditions Zucchinis prefer warm conditions with 28-34 degree days and 18-25 degree nights. Frosts and cold ( $<10 \mathrm{C}$ ) will cause severe yield reduction or total losses. Soil temperatures should be over 18 C Frost Sensitivity: Very sensitive to cold and or frosty conditions. Seed Requirement Direct Plant (kg/ha): 2.5

Seed Planting Depth (cm): 3.0
Seed Requirement Transplant (g/ha): Seeds per gram (approx): 5-10
Plant Population: 6600-11000 per Ha
Row spacing: 1.5-1.8 metres
Plant Spacing: 0.5-1 Metre
Potential Disease Problems: Powdery Mildew and mosaic viruses are the most serious diseases of Zucchini's

## Germination Information

Germination Temperature: Range 15-35 C Optimum 23-28 C
Days to Emergence: 3-7 days
Emergence to Transplant: 8-14 days
Plant to Maturity: 38-48 days
Transplant Recommendation: Extreme care required to prevent transplant shock, maximum 3rd true leaf.

## Soil and Nutrition

| Salinity Sensitivity: medium salt tolerance | Optimum pH: 5.5-6.8 |
| :--- | :--- |
| Nutrient Removal (kg/ha) (At average yield, greater if yield is higher) |  |
| Vegetative: $\mathrm{N} 60 \mathrm{Kg}, \mathrm{P} 12 \mathrm{Kg}, \mathrm{K} 60 \mathrm{Kg}, \mathrm{Ca} 95 \mathrm{Kg}, \mathrm{Mg} 22 \mathrm{Kg}$. per Ha |  |
| Harvested Product: $\mathrm{N} 40 \mathrm{Kg}, \mathrm{P} 10 \mathrm{Kg}, \mathrm{K} 35 \mathrm{Kg}$. |  |
| Total Nutrient Removal |  |
| $\mathrm{N} 90 \mathrm{Kg}, \mathrm{P} 22 \mathrm{Kg}, \mathrm{K} 95 \mathrm{Kg}, \mathrm{Ca} 120 \mathrm{Kg}, \mathrm{Mg} 25 \mathrm{Kg}$. per Ha |  |
| Fertiliser Application: Approximately $50 \%$ of totals and $90 \%$ of P should be as a basal <br> dressing balance in regular timed applications once harvest has commenced to maintain <br> active growth and fruit set |  |

## Irrigation Requirement

Irrigation System: Flood or trickle irrigation is preferred, over head systems can increase incidence of fungal disease
Water Usage (average): 2.9-3.5 MI per Ha

## Yield Potential

Average Yield: 1200-1400 cases per Ha
Packing: Zucchini's are usually packed in $1 / 2$ or $1 / 4$ bushel cartons $4-7 \mathrm{~kg}$. Average harvested fruit size will dramatically influence overall yield.
