

Thinking salad mix? **Think Terranova**

SALAD MIX PRODUCT GUIDE

Welcome

Terranova Seeds is a specialist vegetable seed company with offices and warehouses located in Australia and New Zealand. Our specialised technical staff and world-class seed production facilities allow us to provide the highest quality seed offering to our customers.

We are committed to supplying high quality seeds with high purity and germination rates; all trialled under local conditions. Our commitment to our quality standards ensures that we provide seeds that perform, and full technical support to you, our customers.

Terranova is a fully owned subsidiary of South Pacific Seeds, however, we trade as a completely independent entity. We also export our range to the Pacific Islands, Asia, Middle East, Africa and Eastern Europe.

Reliable seeds. Quality seeds.

That's what you can count on whenever you think Terranova Seeds.

Lettuce

Green Tango

Hendrix

Green Tango

- **HENDRIX** is a multileaf Green Tango lettuce
- It is a highly vigorous, quick maturing type with very high yield potential. It has a strong leaf texture that washes well and is suitable for multiple harvests
- **Downy Mildew Resistances:** 16, 19, 21, 23 & 25.

Marley

Green Tango

- **MARLEY** is very high yielding with highly incised leaf shape
- The colour is dark green and the texture is strong
- The product washes well and complements Terranova BOWIE (Red Tango)
- **Downy Mildew Resistances:** 16-23.

TSM 7053

Green Tango

- **TSM 7053** is a new Hendrix type for winter production
- High vigour line which grows very quickly under cool conditions
- Improved mildew resistances
- Dark green leaf with strong texture and good shelf life
- Suitable for multiple harvests
- **Downy Mildew Resistances:** 16-28.

TSM 7047

Green Tango

- **TSM 7047** is a new Hendrix type lettuce with improved mildew and leaf characteristics
- Medium vigour variety offers more controlled growth during warm periods
- Darker green leaf colour with very small leaf attachment
- Light cupping in the leaf prevents bag stick after washing
- **Downy Mildew Resistances:** 16-28.

Lettuce

Green Oak

Cilla

Green Oak

- **CILLA** is a well coloured Green Oak
- The leaf margin is quite serrated and the texture is very tough
- Cilla is slower growing than some other varieties. A feature is dark green foliage
- Very good regrowth potential
- **Downy Mildew Resistances:** 16, 18-20, 23-25.

Zeppelin

Green Oak

- **ZEPPELIN** is a Green Oak type
- The variety has a dark green leaf with smooth lobed margins
- It is a medium vigour line and holds well in the field at maturity
- **Downy Mildew Resistances:** 16-28.

Oasis

Green Oak

- Oasis is a new high yielding Green Oak
- Fine leaf shape with strong texture
- Dark green colour with light leaf cupping
- Very fine leaf attachment with small cut surface
- **Downy Mildew Resistances:** 16-28.

Lettuce

Red

Bowie

Red Tango

- **BOWIE** is a strong textured Red Tango
- It offers better Mildew resistance and more intense red colour, but has similar growth times and leaf characteristic
- The highly serrated leaf with strong texture ensures that it washes very well
- **Downy Mildew Resistances:** 16-28.

Hucknall

Red Coral

- **HUCKNALL** is a high yielding Red Coral variety
- The leaf texture is thicker and stronger for longer shelf life
- Suitable for multiple harvests
- Good field tolerance to Bacterial Spot
- **Downy Mildew Resistances:** 16-26

Sheeran

Red Oak

- **SHEERAN** is a highly Mildew resistant Red Oak leaf
- Medium vigour variety with beautiful dark red glossy colour
- Strong leaf texture for a red oak with light cupping
- Multiple cuts are possible
- **Downy Mildew Resistances:** 16-31.

TSM 7058

Red Coral

- New Red Tango with higher levels of Mildew resistance
- Same attractive colour and strong texture as Bowie
- Growth is more controlled making it suitable for mid summer production
- **Downy Mildew Resistances:** 16-31.

Lettuce

Cos

Presley

Green Salad Cos

- **PRESLEY** is a new generation ORBISON type with a better Mildew package
- The leaf is slightly wider offering better yields. The colour and leaf texture are very similar to Orbison
- Presley has shown excellent Mildew tolerance in field trials
- **Downy Mildew Resistances:** 16-26.

Aretha

Red Salad Cos

- **ARETHA** is the next generation Red Cos
- Bred for improved shelf life and Mildew protection
- Very thick leaf texture and slightly blistered leaf
- Aretha has a small leaf attachment and high yield potential
- **Downy Mildew Resistances:** 16-28.

TSM 6025

Green Salad Cos

- New Gem style Cos
- Med-fast maturity makes it suitable for cooler season production
- High levels of Mildew resistance
- **Downy Mildew Resistances:** 16-28

Specialty Lettuce

ZAZU

Cos

- **ZAZU** is a new Poco type Cos lettuce
- Compared to Poco - it offers slightly heavier weights through increased leaf numbers and has a darker leaf colour
- Zazu performs well against bolting and tipburn
- Great tasting
- **Downy Mildew Resistances:** 16-23.

Simba

Mini Cos

- **SIMBA** is a new Mini Cos with high levels of Downy Mildew resistance
- Very attractive, glossy leaf with excellent texture
- Good bolt and tipburn tolerance
- No internal bleeding
- **Downy Mildew Resistances:** 16-31.

TLS 7049

Greenleaf

- **TLS 7049** is the next generation of Greenleaf specialty lettuce developed for higher yields and low leaf brittleness
- Higher leaf counts with darker, more uniform leaf colour across the entire leaf and improved texture
- More durability with low leaf damage during the wash processing which leads to increased recovery
- **Pre-Commercial Seed Now Available.**

TLS 7077

Green Oak

- New release Green Oak
- Suitable for twin pack production
- Compact type with high leaf counts and good yields.

Rocket Varieties

Darkita

Speedy Rocket

- **DARKITA** is the latest release speedy Rocket
- Compared to Gemini, it has a darker leaf colour and more finely serrated leaf shape
- The leaf is very uniform in size and shape and holds colour well after harvest.

Extrema

Wild Rocket

- **EXTREMA** has finely serrated leaves which are dark green and aromatic
- This variety has a slightly bitter, peppery flavour and yields very well
- It has good bolting tolerance for a Wild Rocket variety and re-grows well after harvest.

Gemini

Speedy Rocket

- **GEMINI** is a speedy Rocket with a Wild Rocket appearance
- It has a dark green serrated leaf with low internal yellowing
- Fast maturing and high yielding, Gemini has good post harvest attributes. Slightly milder taste compared to Wild Rocket.

Other Salad Mix Varieties

Red Leaf

Beet

- **RED LEAF** is a salad leaf Beet with beautiful deep red colour
- Smooth leaves with a strong texture and upright growth habit makes harvesting easier
- It is best grown in cooler periods as the red leaf colour is lost during periods of rapid growth.

Rhubarb Red

Swiss Chard

- **RHUBARB RED** is a reliable and well maintained commercial variety popular in Australian salad growers' programmes
- Selected for improved bright red stems which extend well into the leaf veins
- The leaf colour is bright green and contrasts well with the dark red stem.

Snooker

Hybrid Red Tatsoi

- **SNOOKER** is a hybrid miniature Red Tatsoi bred specifically for salad leaf production
- The leaf is dark red and maintains its colour during warm periods
- The habit is upright and the petiole length is long for easier harvest
- Leaf shape is highly uniform.
